DETAILED ACTION

Claim Objections

1. Claim 15 is objected to because of the following informalities: "with including" in line 2 is redundant. It is suggested that Applicant delete one of these two words. Appropriate correction is required.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 9-10 and 15-16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

✓ Claims 9-10 and 15-16 are rendered indefinite by the phrases ""double-layer structure" and "pseudo double-layer structure." It is not clear what the distinction is between a double-layer structure and a *pseudo* double-layer structure. In addition, all of the rejected claims are directed to structures having more than two layers. Thus, it is not clear that the double-layer consists of the perpendicular magnetic recording layer and the soft magnetic layer.

Claim Rejections - 35 USC § 102/103

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 1773

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 1-2, 4, 6-7, 9, 12-13 and 15 are rejected under 35 U.S.C. 102(e) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Ikeda et al. (US 6468670).

Ikeda et al. disclose a perpendicular magnetic recording medium having a soft underlayer, a NiAl layer, a Ti layer and a magnetic layer disposed on a substrate. While the reference does not explicitly state that the Ti underlayer suppresses continuous crystalline growth from the underlying layer to the magnetic recording layer, the reference inherently satisfies this limitation by virtue of the fact that Lambeth et al. teach the same materials for the claimed layers.

It has been held that where claimed and prior art products are identical or substantially identical, or are produced by identical or substantially identical processes, the burden of proof is shifted to applicant to show that prior art products do not necessarily or inherently possess characteristics of claimed products where the rejection is based on inherency under 35 USC

§102 or on prima facie obviousness under 35 USC §103, jointly or alternatively. *In re Best, Bolton, and Shaw*, 195 USPQ 430. (CCPA 1977).

7. Claims 1-8, 10-14 and 16 are rejected under 35 U.S.C. 102(e) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Lambeth et al. (US 6248416).

Lambeth et al. disclose a perpendicular magnetic recording medium having a first underlayer formed from a material such as Ag or Au, a second underlayer formed from a material such as Cu, a soft magnetic underlayer, a third underlayer formed from Ti and a magnetic layer, all disposed on a substrate. While the reference does not explicitly state that the Ti underlayer suppresses continuous crystalline growth from the underlying layer to the magnetic recording layer, the reference inherently satisfies this limitation by virtue of the fact that Lambeth et al. teach the same materials for the claimed layers.

It has been held that where claimed and prior art products are identical or substantially identical, or are produced by identical or substantially identical processes, the burden of proof is shifted to applicant to show that prior art products do not necessarily or inherently possess characteristics of claimed products where the rejection is based on inherency under 35 USC §102 or on prima facie obviousness under 35 USC §103, jointly or alternatively. *In re Best, Bolton, and Shaw*, 195 USPQ 430. (CCPA 1977).
